

BRIGHT TV VIEWERSHIP ANALYSIS

DATA ANALYSIS PROJECT

4. Key Performance Indicators

TOTAL SUBSCRIBERS

4386

TOTAL SESSIONS

10 000

WATCH TIME IN HOURS

1537

TOTAL CHANNELS

17

1. Project Objectives

- **Understand who the Bright TV viewers are.**
- **Identify viewing patterns across time, channels and content.**
- **Analyse subscriber engagement and viewing behaviour.**
- **Turn the analysis into practical business recommendations.**

2. Data & Tools

- **Data source: Bright TV case study dataset.**
- **SQL / Databricks — data inspection, cleaning and transformation.**
- **Excel — pivot tables, slicers and visual analysis.**
- **Power BI & Data Studio — interactive dashboards.**
- **PowerPoint — communicate insights and recommendations.**

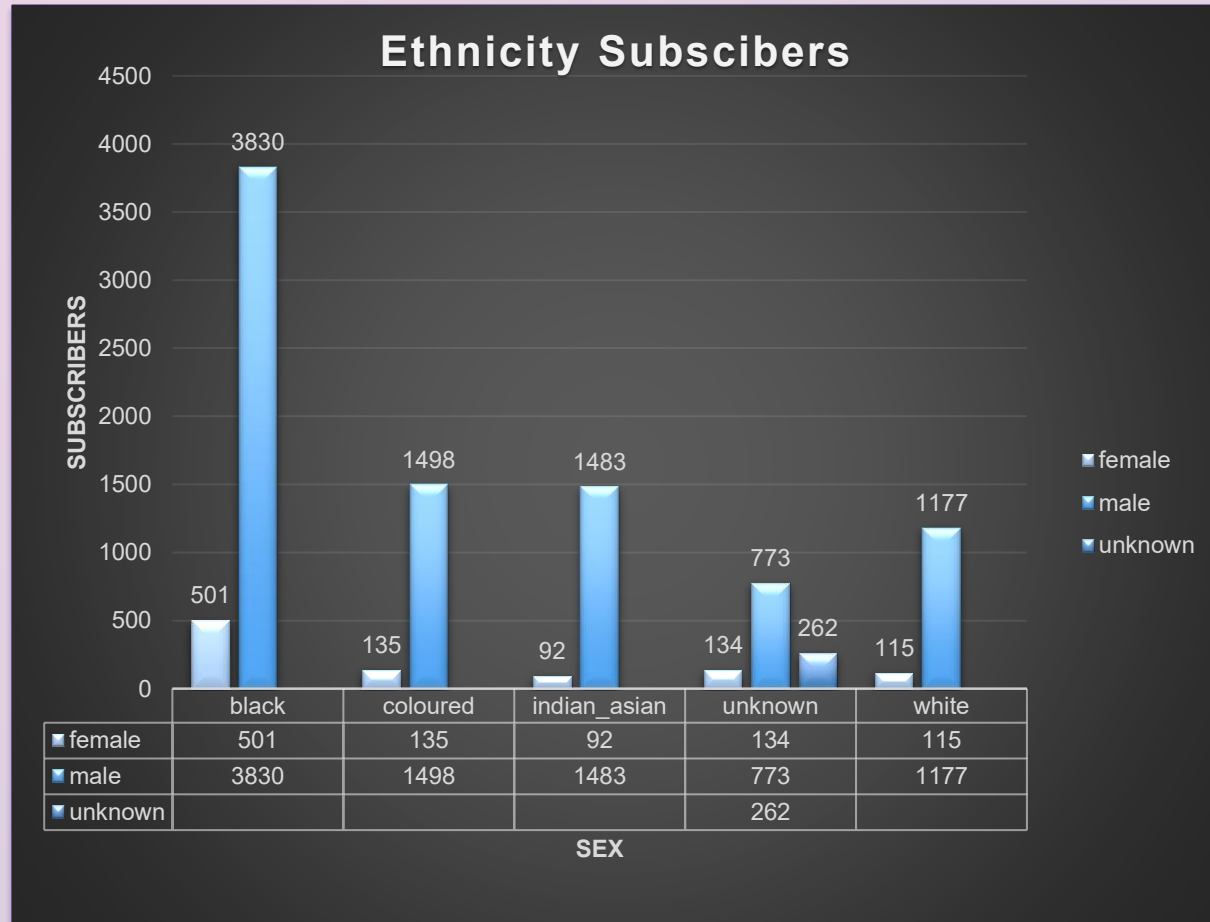

3. Data Preparation

- **Checked the available tables and fields.**
- **Identified duplicate User IDs in the user profile data.**
- **Handled missing values and standardised unknown / blank categories.**
- **Used joins to combine viewership and user-profile information.**
- **Created calculated fields for dates, viewing time and duration.**

8. KEY INSIGHTS

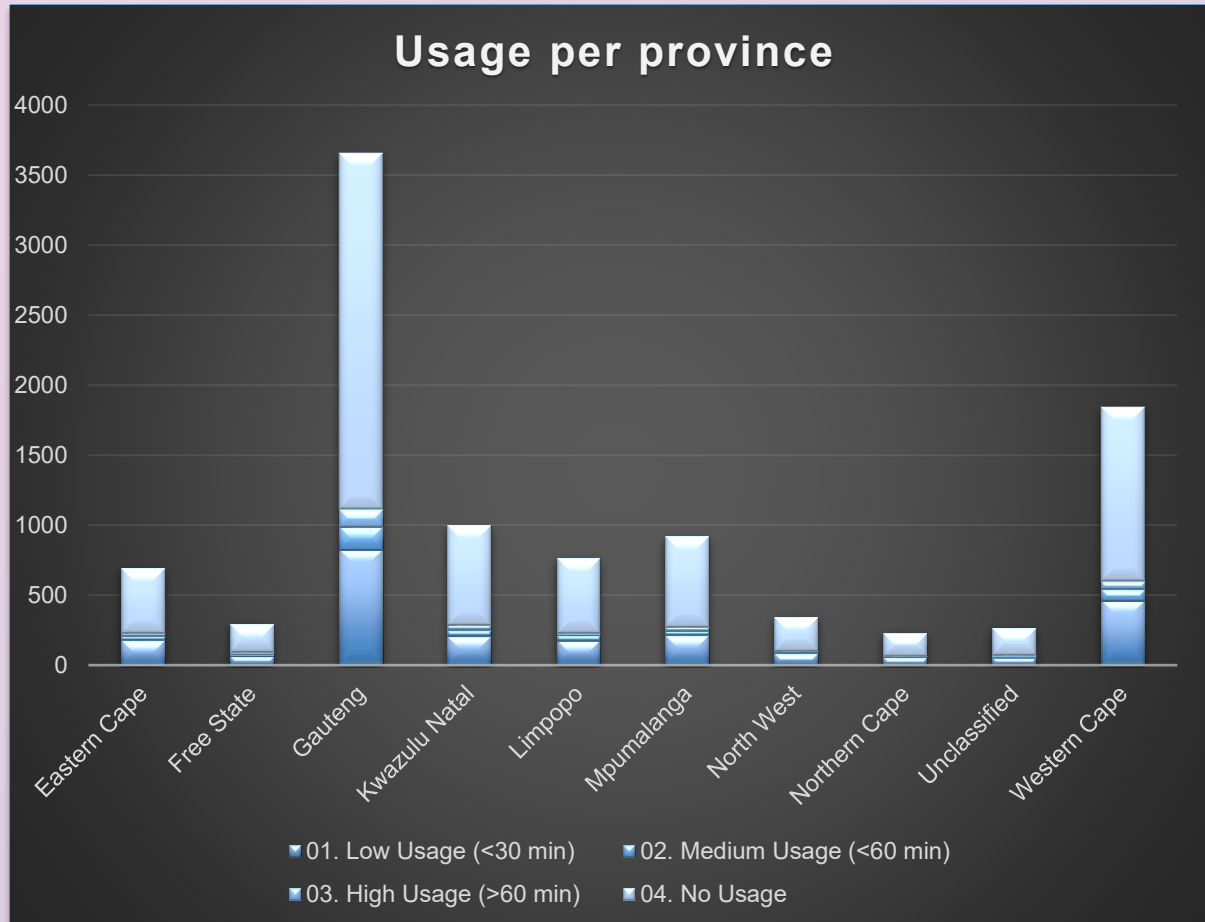

- **Target content and promotions toward the strongest viewer segments.**
- **Schedule key content around peak viewing periods.**
- **Use channel/content performance to guide programming decisions.**
- **Improve subscriber engagement using personalised communication where appropriate.**
- **Continue monitoring viewing behaviour through interactive dashboards.**

5. Ethnicity and Sex Insights

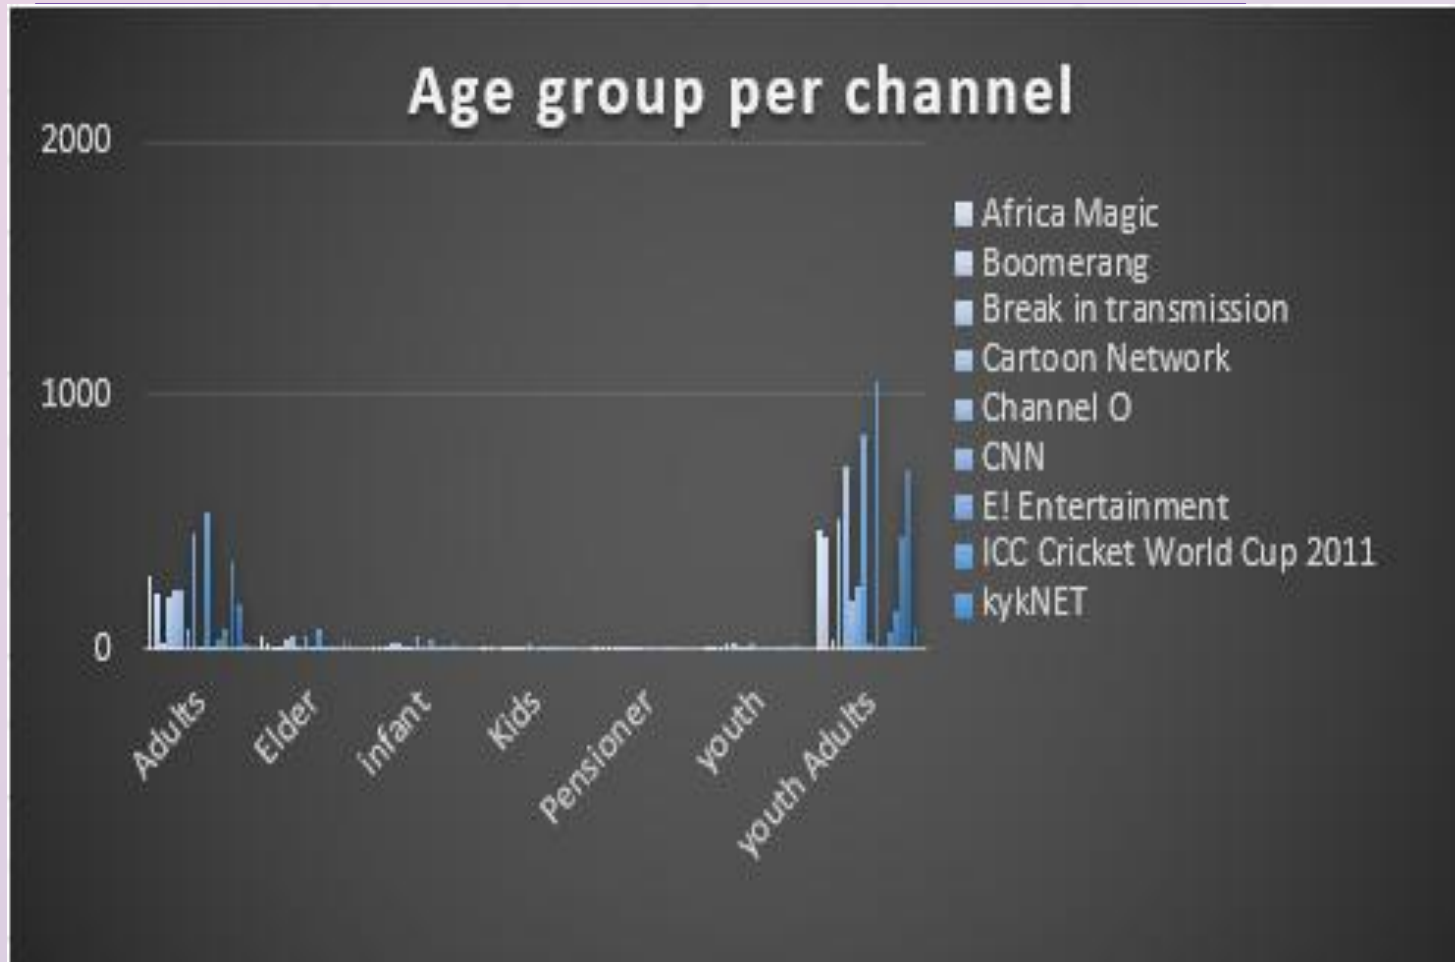

- The black race is dominant for viewership.
- Insight 2: In all the ethnicities the males are dominant viewers
- This graph shows us the gender we can target in terms of shows that favour them. As well as insights the show tat can be streamed to accommodate the other races.

6. Viewing Behaviour

- **Gauteng has the highest peak of usage and engagement .**
- **The lowest province with engagements is Northern Cape.**
- **The low peak could be due to a number of reason, like population and interest in shows being streamed. Auten has the highest because it has a higher population.**

7. Age Group and Channel Insights

- Young Adults have the highest viewership followed by Adults. With the lowest being pensioners and Kid.
- The channel with the most views is Live Events and ICC Cricket

RECOMMENDATIONS

- Target content and promotions toward the strongest viewer segments.
- Schedule key content around peak viewing periods.
- Use channel/content performance to guide programming decisions.
- Improve subscriber engagement using personalised communication where appropriate.
- Continue monitoring viewing behaviour through interactive dashboards.
